### OBJECTIVES

After having my undergraduate and post graduate studies, I have gained sufficient knowledge in using Information Technology effectively. I used and still use all the skills I gained in order to improve education and provide effective learning environments. Distance education is current and future learning approach indicator because of supporting lifelong learning, reaching large masses, and having a student-centered approach. That is why I tended to study in the field of Distance Education and completed my PhD degree in this field. My aim is to increase my knowledge level of information technology, and conduct studies that support cultural and intercultural education.
